

MESHACK KIBOMA

Full-Stack Developer | Jr Software Engineer | Game Developer | Cryptographer

| Nairobi, Kenya | omangimeshack@gmail.com |

CURRICULUM VITAE SUMMARY

Detail-oriented software developer with 2+ years of experience building responsive web interfaces, backend services, and interactive applications. Primary focus is backend development, with hands-on work across Python, Flask, Django, C#, .NET, Blazor Server, React, Node.js, Express, SQL, JavaScript, TypeScript, HTML, and CSS. Built and deployed 19+ projects spanning calculators, real-estate sites, web games, and financial systems, with a strong emphasis on reliability, maintainability, and production readiness.

CORE SKILLS

Backend:	Frontend:
Python. Django. Flask. ASP.NET Core. Blazor Server. Node.js. Express. Spring. Laravel. Ruby on Rails	React. Next.js. Angular. Svelte. Nuxt. HTML5. CSS3. JavaScript. TypeScript
Data & APIs:	Tools:
SQL. REST APIs. Relational databases. Socket.IO	Git. GitHub. CI/CD. Testing. Deployment. Monitoring. Code editors. IDEs.

EXPERIENCE

Jr Software Engineer, Backend Development

- Built and supported backend-focused work while continuing to sharpen production deployment discipline.
- Contributed to systems used for financial and exchange-style workflows, with a focus on secure and maintainable architecture.

Frontend Engineer / Team Lead

- Deployed several projects as a team leader and built a real-time auction interface.
- Focused on user experience improvements and backend security features for future builds.

Backend Engineer

- Designed and built microservices systems where many trades have been executed.
- Worked with stakeholders to develop a Mining Commodity Exchange System and led the development team through successful deployment.

Aspiring DevOps

- Maintained multiple systems in production and prepared for Red Hat and AWS Solutions Architect certifications.

SELECTED PROJECTS

Calc — Full-stack scientific calculator built with a Flask backend and canvas-rendered UI. Uses a custom AST parser for safe expression evaluation, with trigonometry, fractions, session memory slots, and a live clock.

Tech: Python, Flask, HTML5, CSS3, JavaScript, Canvas API

Dice Arena — Blazor Server casino dice game with 3D canvas dice, three game modes, a custom dice builder, leaderboard support, and immersive audio.

Tech: .NET, C#, Blazor Server, HTML5 Canvas, CSS, JavaScript, JSON

Novara Estates — Modern real-estate website designed to present premium properties through a clean, responsive interface and simple property exploration flow.

Tech: HTML5, CSS3, JavaScript

Endless Runner — Responsive endless runner web game with dynamic gameplay mechanics and a polished cross-device experience.

Tech: HTML5 Canvas, CSS3, JavaScript

EDUCATION & CERTIFICATIONS

Full-Stack Developer Certificate — FreeCodeCamp, Sep 2024 – Apr 2026, Excellence

Python Certification — FreeCodeCamp

Foundational C# with Microsoft — FreeCodeCamp

Relational Databases — FreeCodeCamp

JavaScript — FreeCodeCamp

Responsive Web Design — FreeCodeCamp

Legacy Responsive Web Design — FreeCodeCamp

BEd student — University of Nairobi, Kenya

CONTINUOUS LEARNING

- Cybersecurity coursework and hands-on hackathon participation.
- Game development fundamentals and interactive UI experimentation.
- Preparing for Red Hat and AWS Solutions Architect certifications.

LANGUAGES

English, Swahili, Spanish, Japanese
